

Mini Net.Media Center™ Voice + Video + Data

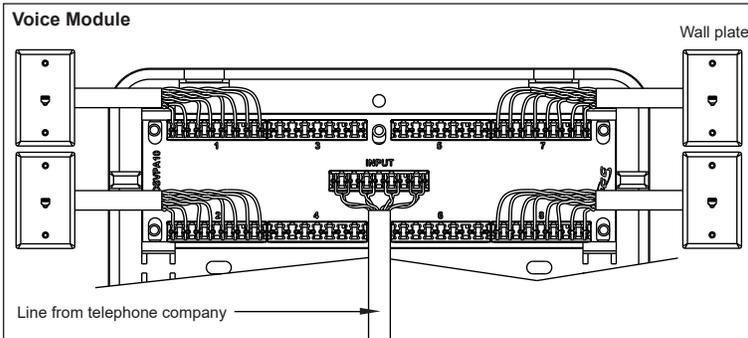

INSTALLATION INSTRUCTIONS

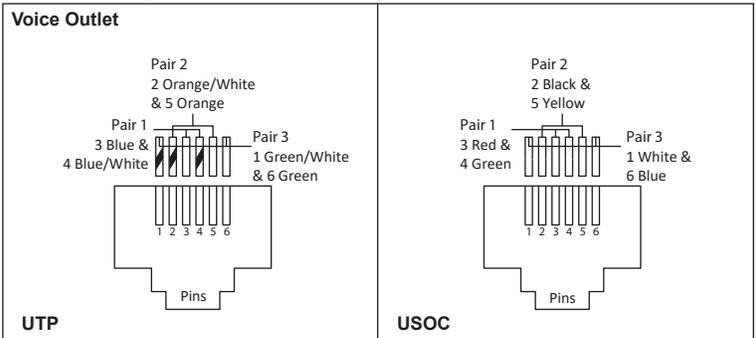

Step 1: Remove the screw to separate the cover from the base. Next, screw the base to a surface at a desirable indoor location using a minimum of 3 points.

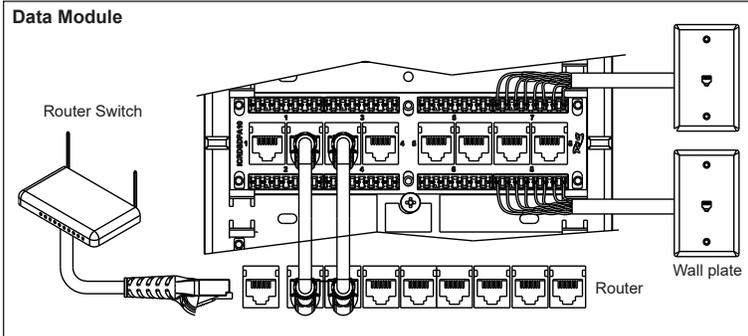

Step 2: Terminate the wires by only using a 110 punch-down tool. Be certain to follow the specified T568A color code for 8P8C installations as per TIA-570 residential wiring standards.

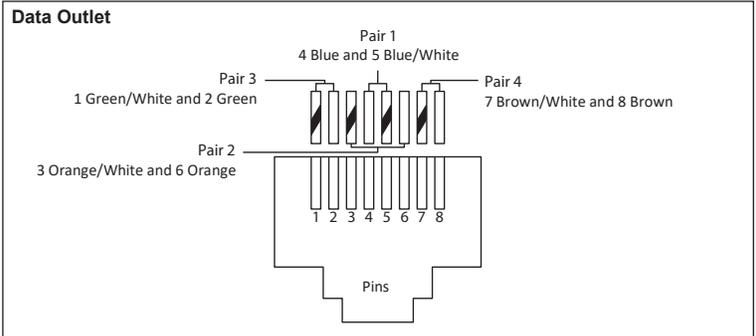

Step 3a: Terminate the incoming phone line to the 110 IDC labeled "INPUT". Identify each outlet cable and terminate to 110 IDC labeled "1~8". Note: Line #1= Blue, Line #2=Orange, Line #3=Green, Line #4= Brown.

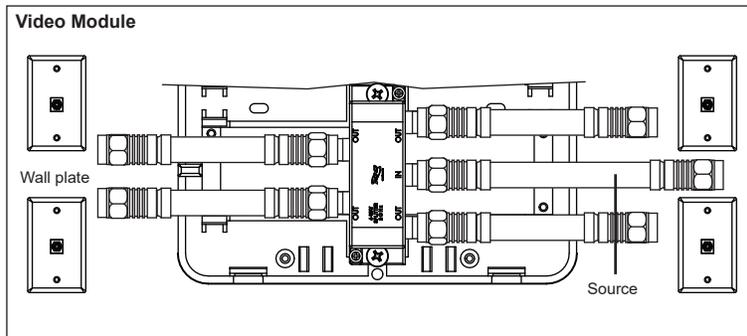

Note: Follow UTP or USOC wiring on 6P6C voice modular connectors to connect up to 3 phone lines per outlet.

Step 3b: Terminate cables on the 4-Pair 110 connectors on the data module. Connect one end of a patch cord to the corresponding jack and the other end to the Ethernet router after identifying the port to activate.

Note: It is important to follow T568A wiring because it allows pair 1 and 2 to be used for phone applications, up to 2 lines.

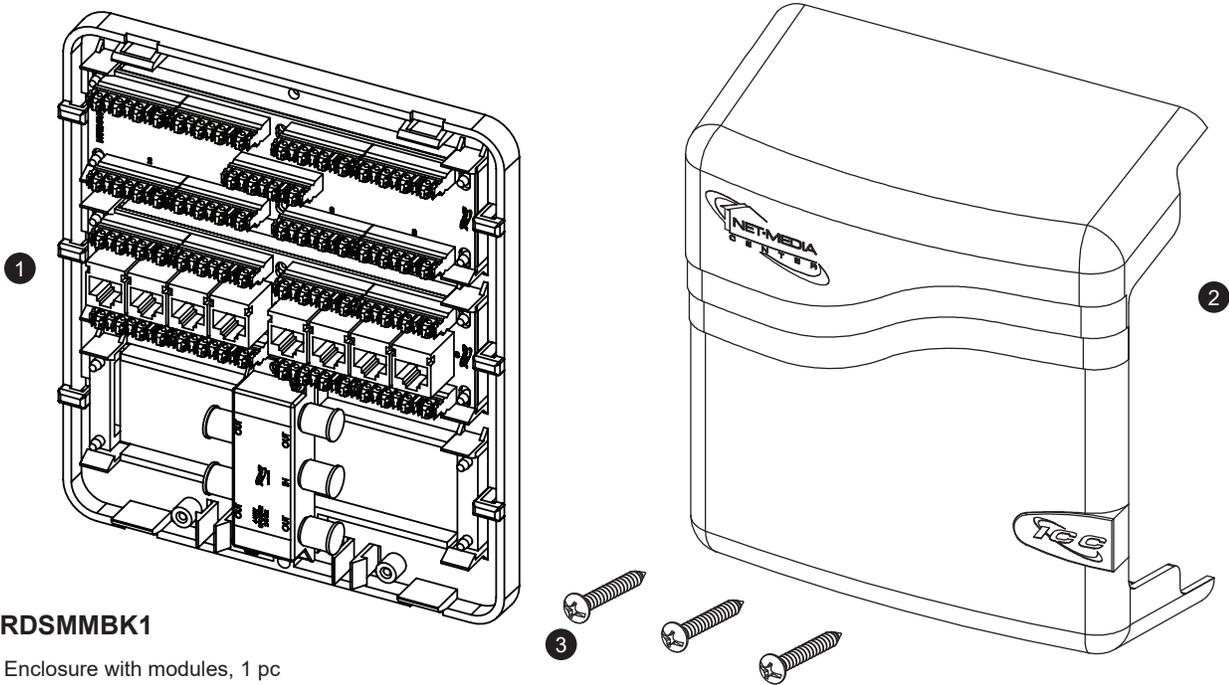

Step 3c: Attach a coaxial cable from the antenna or cable TV source to the "IN" connector on the splitter. Up to 4 TV tuners can be connected to the "OUT" connectors.
